

My FAVORITE ANIMAL

Cats

I chose a cat because I have it at home.
 Sometimes she scratches but she is very nice and kind.
 It occurs both in fairy tales and in the garden
 and in the house.
 The cat can be brown white and black or even orange.
 A cat can eat meat or cat food.
 Cat is wise.
 Cats own fish.
 The cat lives in the village.
 Some cats are bald.
 I have a cat and her hair is falling out.
 My cat has green eyes.

Haboz Ilina G.C

SHE LIVES
AT
HOME.

SHE EATS MEAT
AND DRINKS WATER,
TREATS.

He is black and has white mouth. He is a watch dog. He is a big dog.
 He likes to swim in the water. Her name is Dazinda. I like to play
 with him, he's my pet.

 like to wash

Domestic — Dog

Домашний Пес

Description

The dog belongs to the canine order, and in body structure it is similar to its relatives. It has a slender muscular body with a massive chest. A muscular neck is attached to the chest at an angle of about 40° , which carries the head with an elongated muzzle.

Hippopotamus

The hippopotamus lives in Africa near the Sahara.

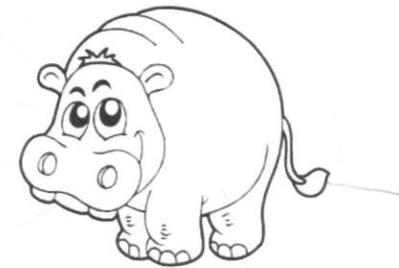

The hippopotamus is a herbivorous; he eating parts of plants, mostly grass and herbs. And he drinks water.

He swims in a slow flowing river, lake and mangroves. Most of his life takes place in water. He can run at a speed of 30 km/h, but only for short distances. He is one of the most aggressive animals in Africa.

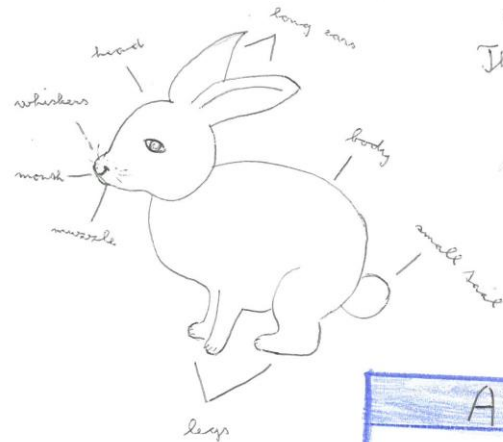

Hippos live to be 40-50 years old.

The hippopotamus is the third heaviest terrestrial mammal and the heaviest representative of even-toed ungulates.

He weighs 1.5-3 tons, exceptionally 4.5 tons.

Rabbit

It's a pet
They live at home
in cages or on
farm.

About

Rabbit is rodent.

They have small body, really
small tail, four short legs,
small head, two long ears,
mouth, whiskers and nose.

We also can see them.

They can be bred for meat.

Rabbit mostly has black, grey or
white coloring.

They eat:

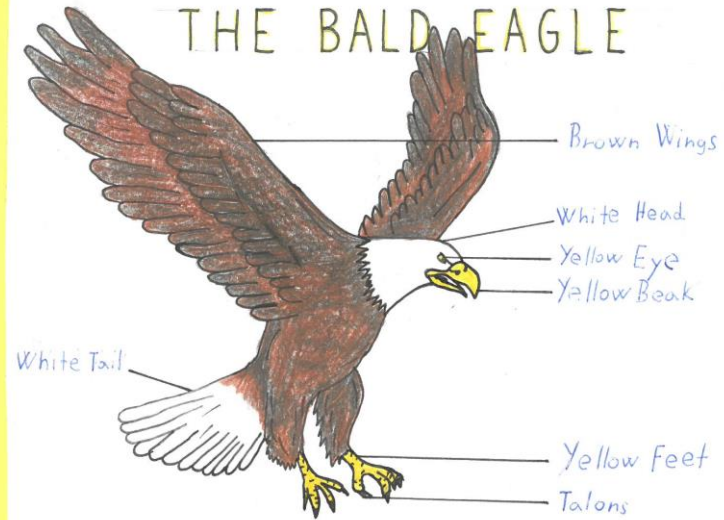

Drink

They drink:

THE BALD EAGLE

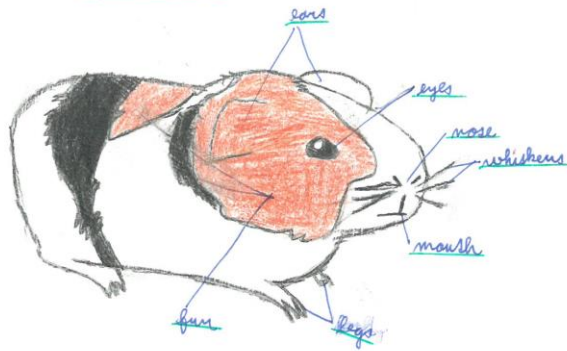

The bald eagle is the national bird of the USA. The bald eagle lives
in the North America on lakes, rivers, marshes and seacoast.
The bald eagle has a dark brown body, a white tail and a white head. The bald
eagle has yellow eyes, a large hooked yellow beak and powerful yellow legs
and talons. The bald eagle has two big wings and an excellent eyesight.
The bald eagle hunts fishes often. The bald eagle eats small animals too.
The bald eagle has a body length of 70-100 cm. The body weight of a bald
eagle is 3-7 kg.

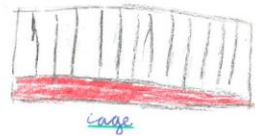

Jasula Givandova

Guinea pig

Guinea pig is a small cute creature. They live in home in big cage with another guinea pig because if guinea pig is alone, it is sad so it needs another guinea pig to play with it. Some guinea pigs like cuddling but some don't like it. Guinea pigs like to eat.

They eat wheat, vegetables, granules, they can eat grass and they drink water. In the world there are a lot of kinds of guinea pigs. Some have very long fur, some have short fur and some guinea pigs don't have fur. Every guinea pig has its temperaments. Some are cuddly and they aren't like, some are cuddly but they can be like you and some aren't cuddly. Guinea pigs are so grateful. You give it food and they are so happy. Guinea pigs have a little body with big black whiskers and eyes. Guinea pigs are good pets so I recommend it.

DOLPHIN

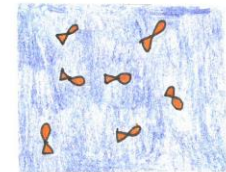

Jana Krupickova

Dolphins live in the sea.

They eat fish.

Dolphins are intelligent. They live in groups. They are friendly. They aren't fish. They are mammals. They're good at swimming. They have a gray body. They live 36 years. They can jump. They are beautiful animals.

Tick

The tick is a mite belonging to the family.

The size of females ranges from 3,5 to 4,5 mm (after sucking even more than 1 cm), males measure 2,2 - 2,5 mm.

Nymphs measure 1,3 to 1,5 mm.

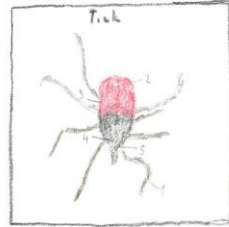

They also act as carriers of a number of infectious diseases, the most frequent being Lyme disease and tick-borne encephalitis.

Their livelihood is human blood.

They occur in forests, especially deciduous and mixed, although they are a typical home of the common tick, but you can also meet it in the garden, meadow or city park.

Ticks are also abundant on the banks of rivers and ponds and on the edges of forest roads.

In general, ticks occur wherever the grass is taller than 20 cm.

- 1) Limbs with claws
- 2) Anus hole
- 3) Shield
- 4) Sex hole
- 5) Shoulder blades

Koala Bear

The koala or, inaccurately, koala bear is a resident in Australia. They are the closest relatives to wombats. Koalas are mostly found in the coastal areas of the mainland's eastern and southern regions.

It is easily recognisable by its stout, tailless body and large, spoon-shaped nose. The koala has a body length of 60-85 cm (24-33 in) and weighs

4-15 kg (9-33 lb.). Fur colour ranges from silver grey to chocolate brown.

Cat

Cats are small animals and live in the house or ⁱⁿ the garden. Wild cats live outside.

Domestic cats eat granules and meat cans. Cats like ^{to} hunt mice and birds. They drink milk and water.

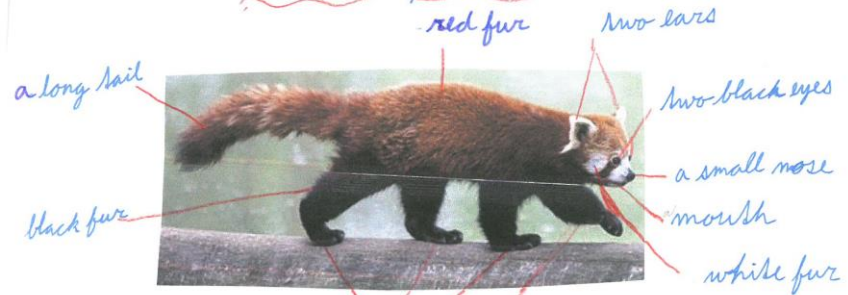

Cats have white, black, gray, brown or cream fur. Cats have long tail, cute face with two lovely eyes, sharp claws and whiskers.

Cats are very good friends with people and very lazy, they usually sleep all day.

I have a beautiful Somcat, his name is Luis. He is eight years old. He is grey and white. I play with him often. I love him very much.

Red pandas

four black legs

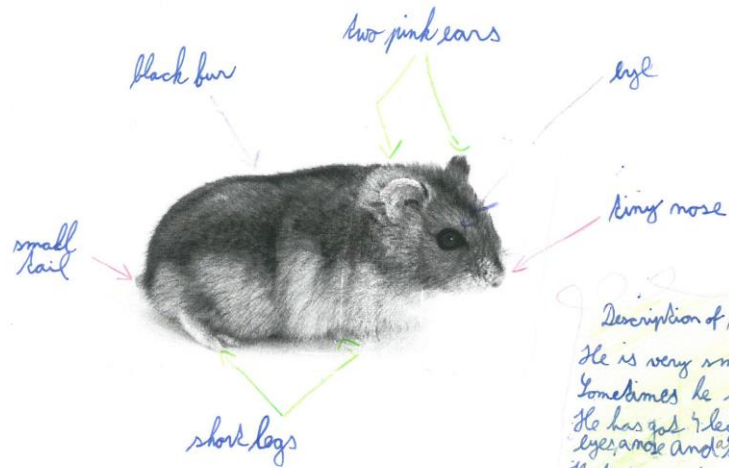

Red pandas live in mountain forest in the southern China, Nepal, Bhutan, India and ~~Myanmar~~ Myanmar. They live ^{at} the zoo, too.

Red pandas eat predominantly bamboo, but they eat berries, eggs and small animals, too. They drink a water.

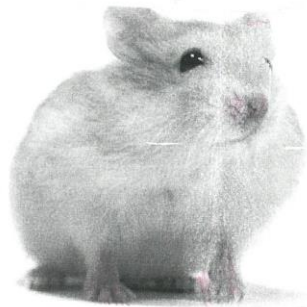

Red pandas have got ~~the~~ two ears, two black eyes, a small nose and a mouth. They have got red, black and white fur. Pandas have got four black legs and a long tail.

HAMSTER

Description of the hamster
He is very small.
Sometimes he likes me.
He has got 4 legs, 2 ears, 2 eyes, a nose and a small tail.
His favourite food is pear.

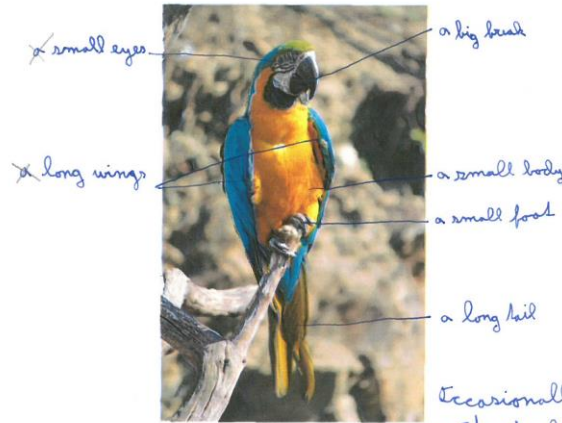

Where does the hamster live?

The hamster lives in various parts of Asia and Russia or in our bedroom.

What he drinks and eat:
He eats hamster food and some fruit like pear and apple.
He drinks water.

I love hamsters

ARA (PARROT)

Ara lives in Mexico, Central America and northern South America after Brazil.

Parrots feed mainly on seeds, berries, fruits and nuts, which it finds high in the treetops.

Occasionally, it also eats insects parts of plants and sweet nectar from their flowers. Ara drinks water.

Ara is a big parrot.
He has colorful feathers that are gorgeous.

He is beautiful and can even speak our language.

He is intelligent because he can count to seven and handle easy tasks.

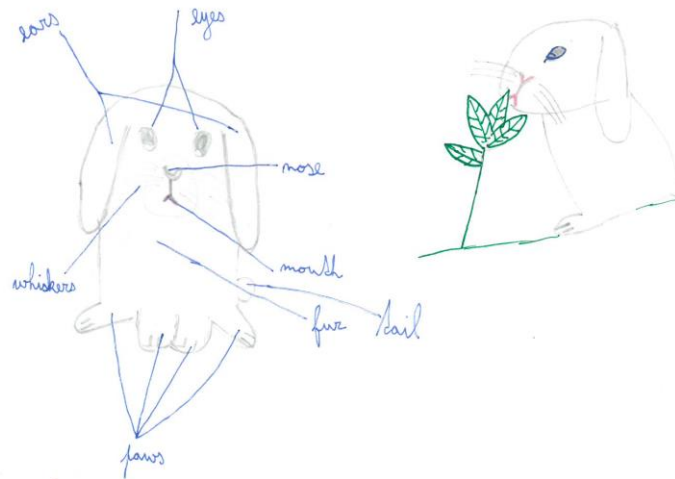

They are perfect!

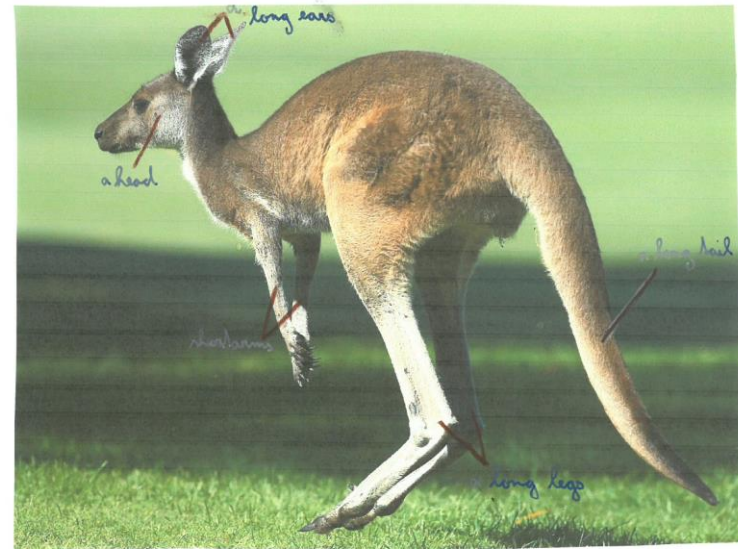

I love them.

Domestic rabbit

The domestic rabbit is a domesticated form of the European wild rabbits. The rabbit is a domestic animal that keeps meat. Rabbit meat contains the least cholesterol. The rabbit is a herbivore. The rabbit eats hay, vegetables, oats and barley. Dwarf rabbit breeds are a popular pet. These rabbits can have ears at the top and bottom. The rabbit reproduces very quickly. There are six to twelve cubs in one litter.

Kangaroo

Kangaroos live in Australia. They are herbivores. They like ~~apple~~ apple, carrot and cherry. Kangaroos are brown. He has long ears, long legs and long tail; but short arms. They're got a small head and long body. ^{their} legs are strong. Kangaroos can stand and jump on two legs.

The 16th of December

RABBIT
